

Neck Spasm Rehabilitation Exercises

Neck rotation with flexion

Chin tuck

Scalene stretch

Neck rotation stretch

Scapular squeeze

Thoracic extension

Neck Spasm Rehabilitation Exercises

You may do all of these exercises right away but avoid any movements that increase your pain.

- **Neck rotation with flexion:**

Right: Turn your head to the right and clasp your hands behind your head. Let the weight of your arms pull your chin to the right side of your chest. Relax. Hold for a count of 15. Do this 3 times.

Left: Turn your head to the left and clasp your hands behind your head. Let the weight of your arms pull your chin to the left side of your chest. Relax. Hold for a count of 15. Do this 3 times

- **Chin tuck:** Place your fingertips on your chin and gently push your head straight back as if you are trying to make a double chin. Keep looking forward as your head moves back. Hold 5 seconds and repeat 5 times.

- **Scalene stretch:** This stretches the neck muscles that attach to your ribs. Sitting in an upright position, clasp both hands behind your back, lower your left shoulder, and tilt your head toward the right. Hold this position for 15 to 30 seconds and then come back to the starting position. Lower your right shoulder and tilt your head toward the left until you feel a stretch. Hold for 15 to 30 seconds. Repeat 3 times on each side.

- **Neck rotation stretch**

Right side: Rotate your neck by looking over your right shoulder. Lift your right hand and place your palm on the left side of your chin. Push your chin with your palm toward your right shoulder. Hold for a count of 10. Do this 3 times.

Left side: Rotate your neck by looking over your left shoulder. Lift your left hand and place your palm on the right side of your chin. Push your chin with your palm toward your left shoulder. Hold for a count of 10. Do this 3 times.

- **Scapular squeeze:** While sitting or standing with your arms by your sides, squeeze your shoulder blades together and hold for 5 seconds. Do 3 sets of 10.

- **Thoracic extension:** While sitting in a chair, clasp both arms behind your head. Gently arch backward and look up toward the ceiling. Repeat 10 times. Do this several times per day.
